

OQSHA ver 14.1

BUG

Look at the date format!!

1. This can even list the PPE items that are NOT returned
2. Plus We could have the usual link to open the app
3. And I received 50 plus of these messages at 12 in the midnight

- 1. The attachment format is NOT the same as what we see in PTW
- 2. The 1MB limit is NOT there in PTW or ticket. Because it seems to be shrinking the quality .. Its common sense to be used that today's cameras give you more than 1 MB size.

Please upload image which is less than 1MB

BUG

The same inspection module allows me to take the picture when it shows the camera symbol – without complaining 1 MB

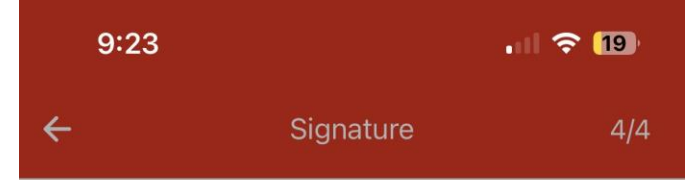

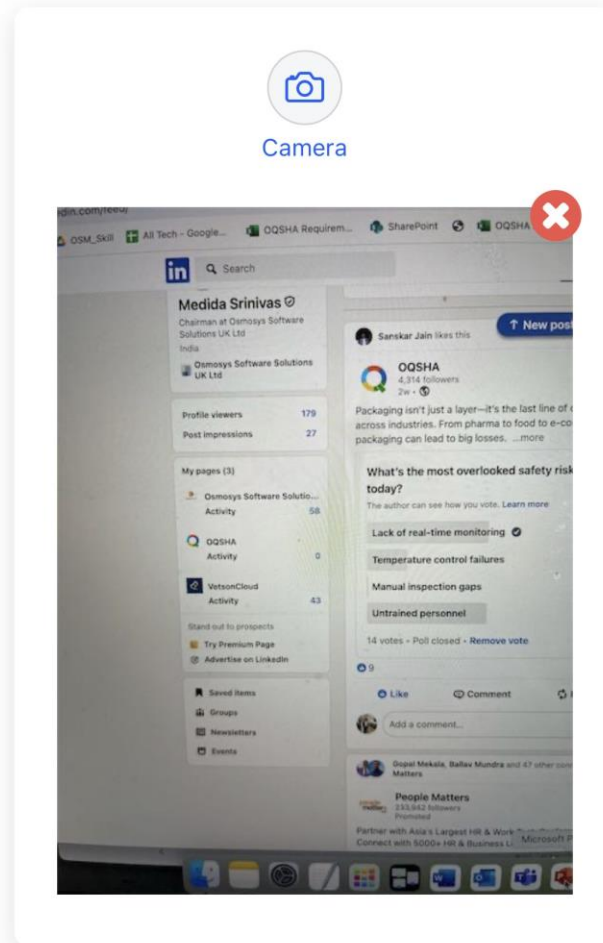

But then when I go to next page – it shows the error and remains in please wait forever

So I have to kill the app and restart

Is the quantity of chemical inside sufficient?

Please wait...

There is an error while processing your request, please try again.

Enhancement

This dropdown of Tasks is not correct. It should allow me to create a new task from here.

But NOT while raising a ticket.

It should allow me to create a new task while editing a ticket.

REPORT

Enhancements

My trainings – how many days old records are we showing? If used regularly this might start choking

Either we put a filter for this or reduce somehow.

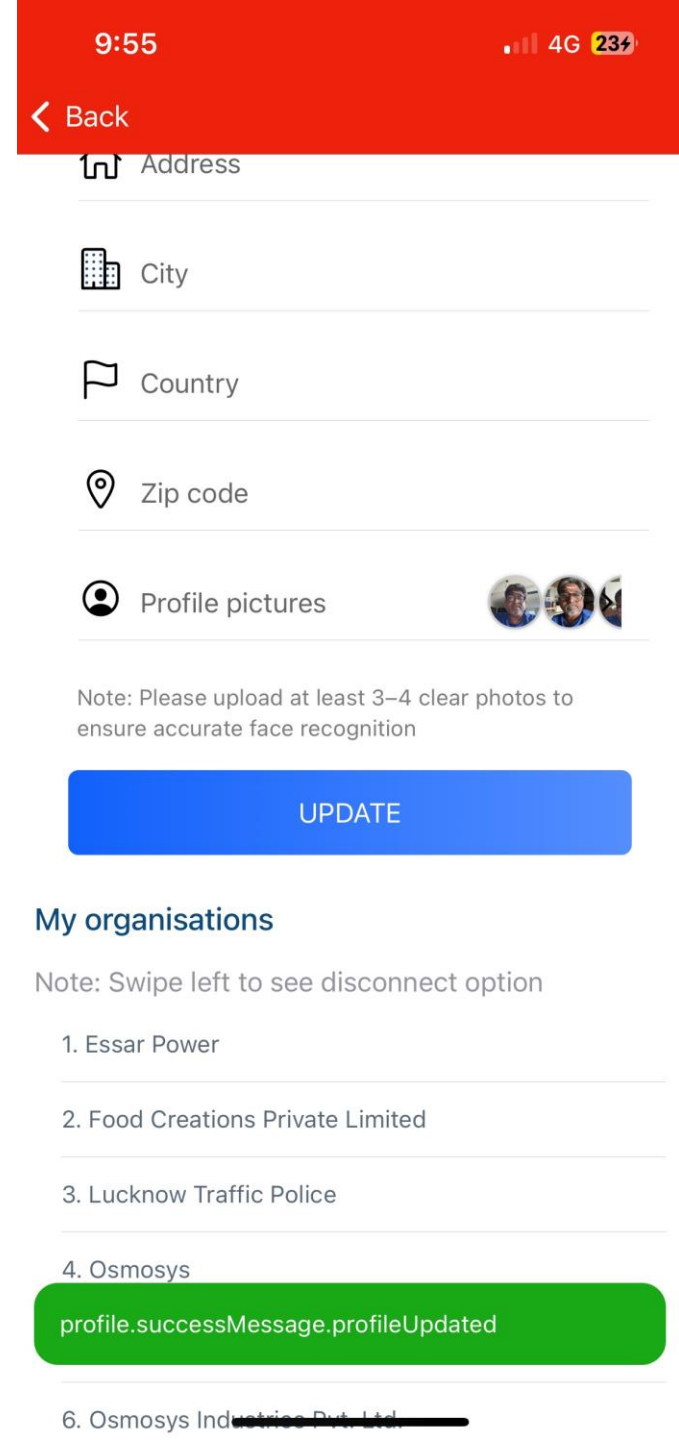

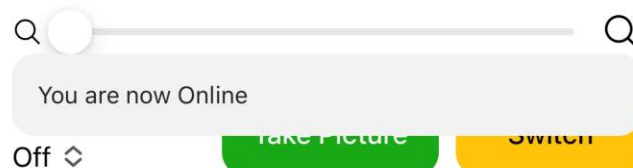

BUG

- 1) I keep getting this “you re now online” message very frequently and its annoying because it blocks the buttons
- 2) The message in the next screen is not correct.
Profile.successMessage.Profile Updated
- 3) All the profile pictures I am adding – will they appear in the user page? I am not able to test this as I am a owner and I cannot edit my record.

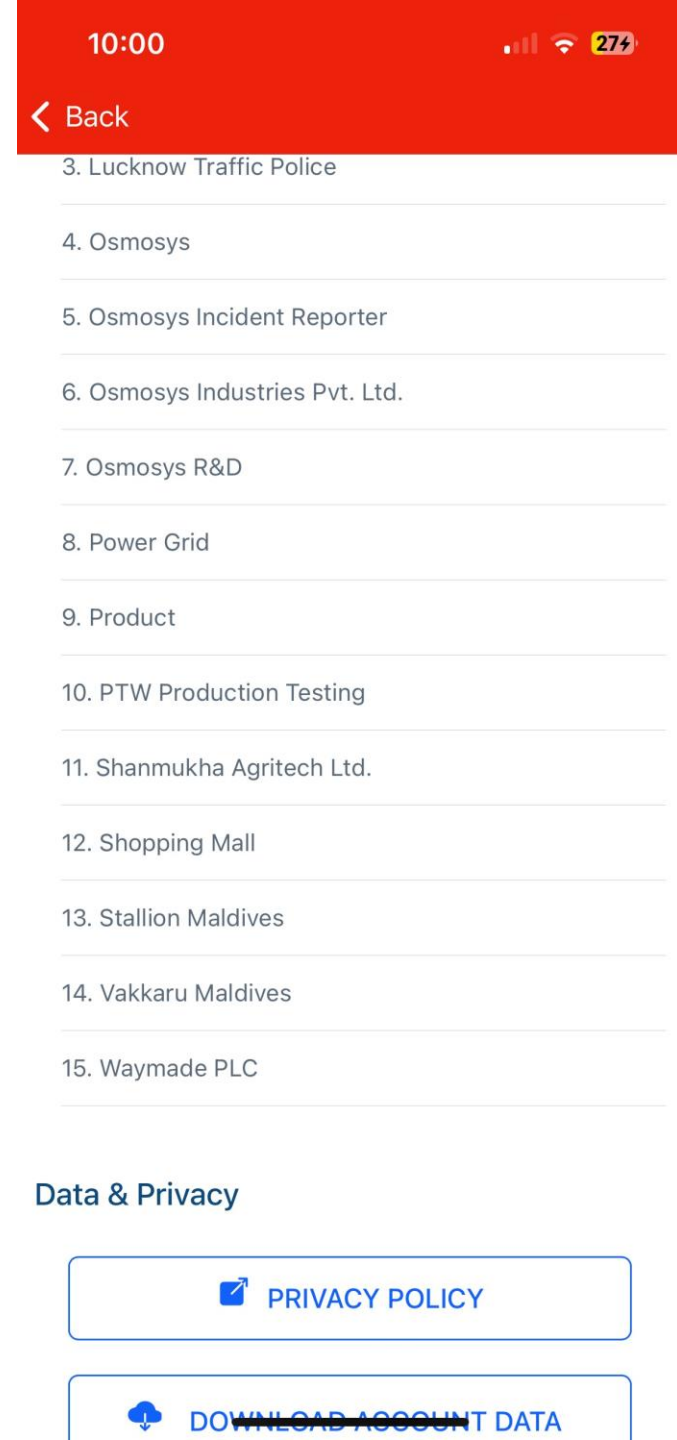

Zoom

BUG

Even after disconnecting from some of these, they are still appearing here
I exited the app and restarted

Do I have to logout & login ? That's too much – we need a better way to handle this.

Enhancement

Even as a owner I think we should allow editing the record

To add things like photos, departments etc

We may NOT allow changing the owner status unless someone else is assigned already.

No PPE kit issued

BUG

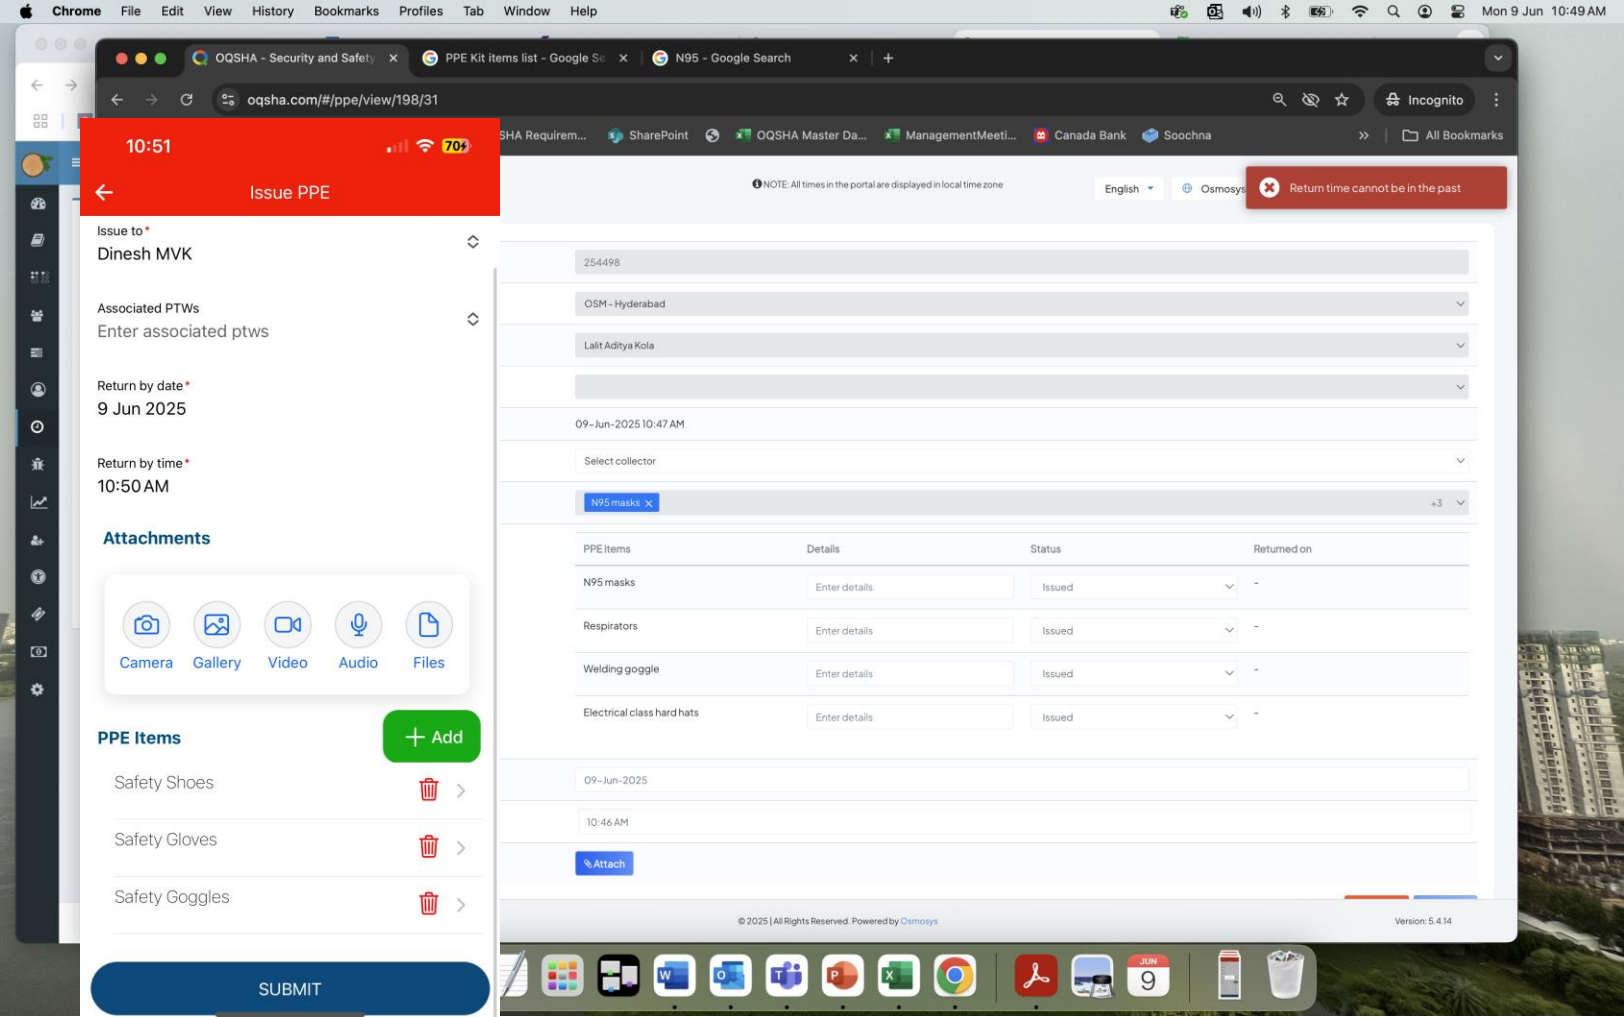

When I created this record from the mobile – it did not complain

But when I open it here – it gives this error message.

As can be seen from the mobile. - the moment I open the issue page, it is by default putting the return time as the current time. But it took me one minute to fill the details (time above the image)

So on the server it is noticing the difference.

So it might make sense to put the return by time to be 6 PM or 8 hrs from the selected time.

- 1) I have only one orgn – so why can't it auto populate?
- 2) Moreover – it says Atleast one orgn / atleast one site.. Only one orgn and one site are allowed – this is NOT a multi-select
- 3) The PPE decription I entered in the PPE setup shall be appearing ehre in the description field and including the image added there.

When I modified the return time, the
button became active.

While it says the return time cannot be
past – it accepted future. Does this
time indicate that the N95 mask and
respitator are returned at 6:45 PM or
does it say the remaining to be
returned by that time?

Collected by* Abhinav Issuer

PPE Items* N95 masks +3

PPE Items	Details	Status	Returned on
N95 masks	Enter details	Returned	-
Respirators	Enter details	Returned	-

Go back | Update

Collected by is a single field
But in this case the first two were
collected by Abhinav

Next two may be collected by
another person

How to handle it?

This ideally should not be
selectable because whoever is
Collecting and filling here – their
name should automatically
come
Like the returned ON time

Can we make this multi-select and give select all option?

Also issued date is single date field now

Lets make it two fields so we can select the list of all items issued between two dates.

We could also have “issued to” person name

I do not see PPE export to CSV – is that happening in 15 or 16?

Enhancement

- 1) User page – make this section collapsible – by default keep it collapsed
- 2) Also since we are now having app version, this could be useful to know how many people are using which version.
- 3) We need a report - so it might be best to put App version in this list - by default NO
